

ECASA WP 3

Annotated sheet for indicators related to the impact of the environment on aquaculture

1- Name of indicator

DOLPHINS
Frequency of observation of dolphins

2- Related source of pressure

Predator attack

3- List of data / parameters required for computation.

Frequency distribution data

4- Description of scientific meaning, references

Complementary to the indicators COLONIES and TUNAS, the frequency of dolphins, the most important predator of aquaculture fishes, that have been observed in the area is indicative of the risk of attack from those organisms.
