

## ECASA WP 2

### ***Annotated sheet for indicators related to the impact of the environment on aquaculture***

#### **1- Name of indicator**

WAVES  
wave-height (average and frequency of extreme values)

#### **2- Related source of pressure**

Weather – Storms

#### **3- List of data / parameters required for computation.**

Meteorological data

#### **4- Description of scientific meaning, references**

Extreme weather conditions have been recorded as a significant source of damage for aquaculture industry. The average and frequency of extreme values of waves could indicate areas with high frequency of extreme conditions which should be avoided.
